

'THE BLACK DOVE'

SYNOPSIS:

Ner-do-well Jake Williams, released from a lengthy prison stay, is on a quest to recover his long-lost Gibson Black Dove guitar. One of only two such guitars manufactured in the 70's, the other belonged to Elvis, Jake seeks to resurrect his music career by finding his old guitar, currently in the possession of his estranged daughter, a modern woman with values quite different from Jake's and whose own musical career is on the rise. But first Jake with his outdated ways must reintegrate himself into the community, fueling a wild and hilarious romp. Teetering on self-destruction, he navigates the search with utter chaos and finds instead something unexpected... himself. John Savage makes Jake's transformation compelling and memorable, a must-see, perhaps the best performance of his career.
